

Summary

I am a software developer with more than 10 years of experience, with a focus on backend web development.

I have more than 5 years of experience in the Rust programming language.

I take pride in writing elegant and maintainable code.

I love and prefer working with and contributing to open source software projects.

Projects

cyclers

(July 2025–Present)

[WIP]

A functional and reactive framework.

Inspired by Cycle.js.

| Rust | async | FRP | GitHub Actions |

Hexciv

(September 2024–June 2025)

[WIP]

Civ VI inspired game, written in Rust using the Bevy game engine.

| Rust | Bevy | tile map | procedural generation |

HyFetch

(June 2024–October 2024)

Ported the entire project from Python to Rust.

Released since hyfetch 2.0.1.

| Rust | CLI |

muvm

(April 2024–Present)

Ported the entire project from C to Rust.

I am a co-maintainer of the project.

| Rust | CLI |

Experience

CariBid

Software Engineer (Contractor)

(November 2024–Present)

- Revamped and hardened authentication system.
 - Integrated OpenID Connect for authentication with Amazon Cognito.
 - Implemented Token-Mediating Backend pattern and other security best practices.
- Implemented bid processing for online auctions.
 - Implemented validation for placement of bids from authorized users for both public and private auctions.
 - Integrated real-time push of bid updates using server-sent events.
- Implemented background processing for completed auctions.
 - Implemented scheduling of background jobs for performing post-auction close tasks.

| Rust | Tokio | axum |
| Diesel | PostgreSQL |
| OpenID Connect |
| Docker | Docker Compose | GitHub Actions |

Bowtie

Software Engineer (Contractor)

(August 2022–December 2023)

- Integrated OpenID Connect for authentication.
- Refactored project to enforce architectural design with cleaner separation and higher maintainability.
- Migrated away from in-house legacy persistence layer to higher-level integration library by Automerge upstream.

| Rust | Tokio | axum |
| Automerge | CRDT |
| OpenID Connect |
| GitLab CI |

Les-Tilleuls.coop

Lead Developer

(February 2018–July 2020)

- Maintained API Platform framework as a Core Team member.
- Planned and executed upgrade process of LVMH projects to newer Symfony and API Platform versions.

- Developed new features and delivered quality improvements for Corum Asset Management project.

| PHP | Symfony | API Platform |
| Hydra | JSON-LD | OpenAPI |
| Doctrine |
| Varnish |
| Docker | Docker Compose | GitLab CI |

Tripviss

Software Engineer

(July 2015–August 2017)

- Designed and built backend web API for travel e-commerce platform startup.
 - Maintained database of travel destinations and POIs, queryable by geometry.
 - Implemented tagging of travel destinations and POIs in tour and activity itineraries.
 - Implemented full-text search for tour and activity products.
- Contributed to API Platform development, and thereafter made a Core Team member.

PHP	Symfony	API Platform
Hydra	JSON-LD	OpenAPI
Doctrine	PostgreSQL	PostGIS
Redis	Varnish	
Docker	Docker Compose	GitLab CI

Company27

Font-end Developer

(September 2014–December 2014)

- Developed new web project for The Battery Shop.
- Developed new web project for Lacelle Malaysia.

Corpick

Software Engineer

(April 2013–August 2014)

- Designed and built web-based system for home and gifts e-commerce store startup.

| PHP | Symfony |
| Doctrine | MySQL |
| Redis |

SeedNet Technologies

Software Development Engineer

(March 2013)

- Developed and integrated stored procedures for web-based plant operations system for Petronas Chemicals.

Education

Bachelor of Computer Science

RMIT University, Australia

(2012)

Diploma in Information Technology

INTI International College Penang, Malaysia

(2010)
